

DataTraveler Vault Privacy 3.0

DataTraveler Vault Privacy 3.0 Anti-Virus

KINGSTON.COM/USB

Safeguard your company's sensitive data.

Kingston's DataTraveler® Vault Privacy 3.0 (DTVP 3.0) USB Flash drive provides affordable business-grade security with 256-bit AES hardware-based encryption using XTS block cipher mode, which offers stronger protection than CBC and ECB modes. It protects 100 per cent of stored data and enforces complex password protection with minimum characteristics to prevent unauthorised access. For additional peace of mind, the drive locks down and reformats after 10 intrusion attempts. It also features a read-only access mode to avoid potential malware risks.

Organisations can customise drives to meet internal corporate IT requirements. Co-logo, serial numbering, dual password, number of attempted password entries, minimum password length and customised product identifiers are all also available through customisation.

The DTVP 3.0 Anti-Virus model features easy-to-deploy anti-virus protection from ESET that protects the drive's content from viruses, spyware, Trojans, worms, rootkits, adware and other Internet-borne threats. The ESET NOD32® anti-virus engine provides instant alerts. This anti-virus protection requires no installation and comes with a five-year pre-activated licence.

SuperSpeed (USB 3.0) technology means that users don't have to compromise transfer speeds for security. Companies can add DTVP 3.0 to their standards list with confidence since its industry-leading NAND and controller design allow for NAND to be interchanged without requalification and certification of security features. DTVP 3.0 is TAA compliant, to meet a frequently requested corporate and government IT requirement.

-
- › 256-bit AES hardware-based encryption to safeguard data
 - › Customisable to meet specific internal corporate IT requirements
 - › Optional anti-virus protection from ESET
 - › SuperSpeed (USB 3.0) technology
 - › TAA compliant

DataTraveler Vault Privacy 3.0

DataTraveler Vault Privacy 3.0 Anti-Virus

FEATURES/BENEFITS

- > **Encrypted protection** — All your data is protected by hardware encryption, so no one can access your data without knowing the password
- > **Fast speeds** — SuperSpeed (USB 3.0) allows for faster data transfers
- > **Customisable** — Customise drives in a variety of ways, including dual password, serial numbering, co-logo, number of attempted password entries, minimum password length and customised product identifier, to meet internal corporate IT requirements
- > **Guaranteed** — For peace of mind, DataTraveler Vault Privacy 3.0 is backed by a five-year warranty, free technical support and legendary Kingston reliability

SPECIFICATIONS

- > **Interface** SuperSpeed (USB 3.0)
- > **Capacity¹** 4GB, 8GB, 16GB, 32GB, 64GB
- > **Speed²**
 - USB 3.0: 4GB: 80MB/s read, 12MB/s write
8GB & 16GB: 165MB/s read, 22MB/s write
32GB: 250MB/s read, 40MB/s write
64GB: 250MB/s read, 85MB/s write
 - USB 2.0: 4GB: 30MB/s read, 12MB/s write
8GB–64GB: 30MB/s read, 20MB/s write
- > **Dimensions** 77.9 mm x 22.2 mm x 12.05 mm
- > **Waterproof** Up to 4 ft.; conforms to IEC 60529 IPX8. Product must be clean and dry before use.
- > **Operating temperature** 0°C to 60°C
- > **Storage temperature** -20°C to 85°C
- > **Compatibility** USB 3.0 compliant and 2.0 compatible
- > **Minimum system requirements:**
 - USB 3.0 compliant and 2.0 compatible
 - Two (2) free drive letters required for use³
- > **Compatible with** Windows® 10, Windows 8.1, Windows 8, Windows 7 (SP1), Windows Vista® (SP2), Mac OS X v.10.7.x -10.11.x, Linux v. 2.6.x⁴
Note: DataTraveler Vault Privacy 3.0 Anti-Virus is not compatible with Mac OS or Linux.

¹ Some of the listed capacity on a Flash storage device is used for formatting and other functions and is thus not available for data storage. As such, the actual available capacity for data storage is less than what is listed on the products. For more information, go to Kingston's Flash Memory Guide.

² Speed may vary due to host hardware, software and usage.

³ First free drive letters after physical devices such as system partition, optical drives etc.

⁴ Certain distributions of Linux will require super-user (root) privileges to execute the DataTraveler commands properly in the terminal application window.
